Using MyMathLab Features

You must already be registered or enrolled in a current MyMathLab class in order to use MyMathLab. If you are not registered or enrolled in a new class, see another PowerPoint for directions for registration or enrolling in a new class.

- Open up an internet browser.
 MyMathLab especially likes Firefox.
- Go to www.pearsonmylabandmastering.com
- Login with your login name and password.
- 'Click' on your course name to get to the home page with the menu.

Whenever you are ready to:

- Do your homework
- •View your **textbook online**
- View your MyMathLab grade book
- Use any other features of MyMathLab

The next group of slides explain how to do all of the above.

If you want to work homework problems from your home computer, you will need to install any necessary software!!!

Adobe FlashPlayer (11.9 or newer) is all that is needed on your home computer or laptop computer. (This is a free download.)

The following slides may look slightly different than what you may see in your current version of MyMathLab.

(Some slides may have been copied from previous versions of MyMathLab or different mathematic courses here at Purdue.)

CourseCompass

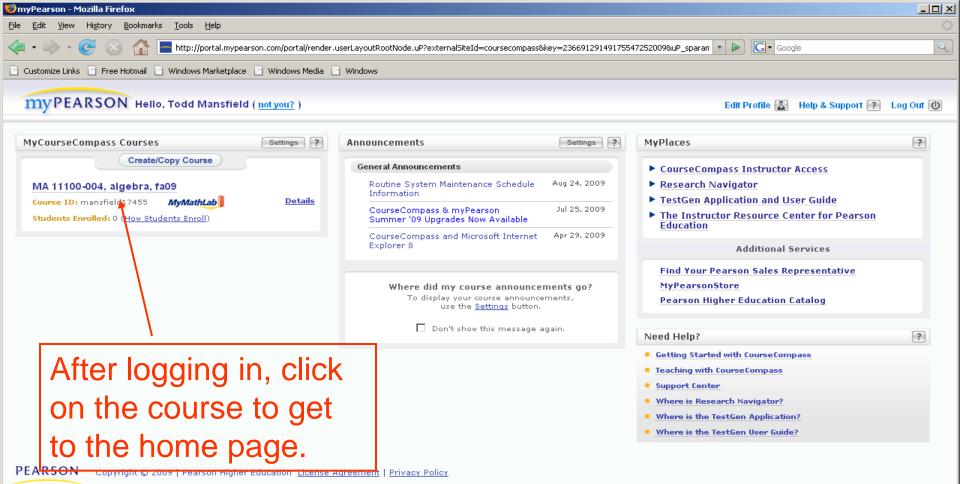

To access your resources, go to: www.pearsonmylabandmastering.com

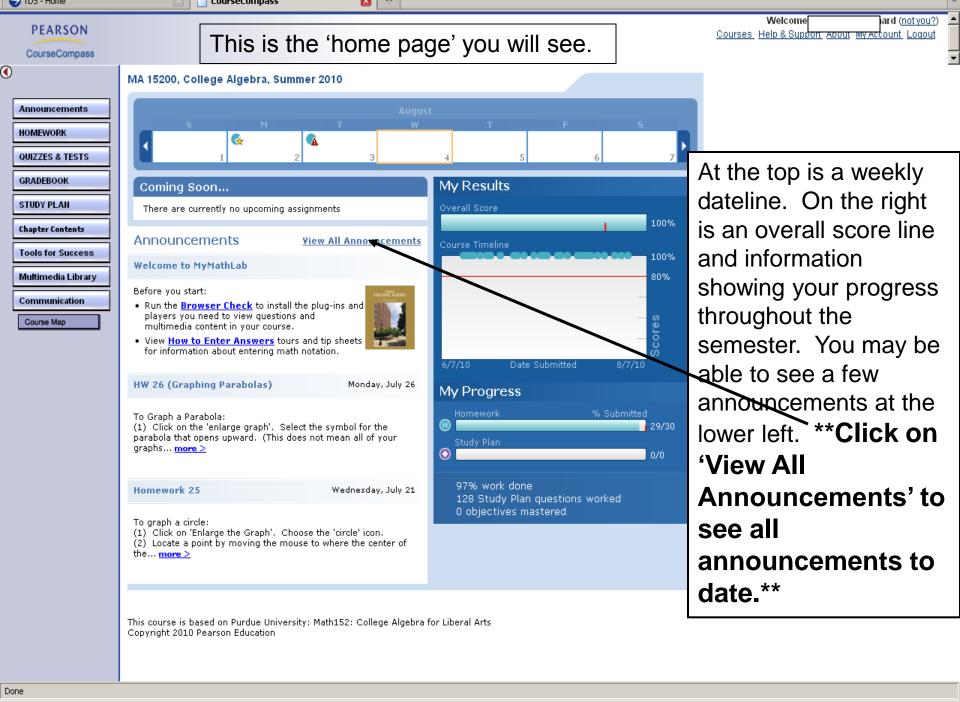

Under Returning Users, click Log In

Note: For those of you that have used MyMathLab (or originally CourseCompass) more than a few years ago, there is a 'new look' to the home page (as of summer 2010).

(Monday, July 26) HW 26 (Graphing Parabolas) To Graph a Parabola: Click on the 'enlarge graph'. Select the symbol for the parabola that opens upward. (This does not mean a symbol for the parabola that opens to the right. Determine the vertex and move your mouse so the point is on the vertex. Click. Determine either the y-intercept and the x-intercepts. Move the mouse so a point is over one of them. Clice (4) Save and check your answer. If you are incorrect, clear all of your work and try again. 	all of your graphs will open upward.) Do not select th	
Course Map	 (Wednesday, July 21) Homework 25 To graph a circle: Click on 'Enlarge the Graph'. Choose the 'circle' icon. Locate a point by moving the mouse to where the center of the circle should be located and 'click'. Move a distance equal to the radius in a direction up, down, left, or right from the center and 'click'. A circle will form. Save your graph and check your answer. (Thursday, July 08) HW 17 Graphing a line using the intercepts is similar to graphing a line using the y-intercept and slope. Click on 'Enlarge Graph'. Select the 'line symbol' either below or to the right and click. Locate the x-intercept by using the arrow keys and click. Locate the y-intercept and click. A line will form. Save the graph and check your answer. 	Several announcements will describe how to enter some answers or give other hints that will help you complete your	
	 (Wednesday, July 07) HW16 To graph a line follow these steps: (1) Click on the message 'Enlarge Graph'. (2) Click on the 'line symbol' from the menu. (3) Move the dot over a point you have determined is one the line and click the mouse. (4) Move to over a second point and click. A line will form. (5) Click 'done' to confirm your answer. (Tuesday, July 06) HW 14 	online homework.	

For problem 1; use the arrows on your keyboard to move the dot left or right then up or down from the origin. Once the 'point' is where you want it, click 'check

Homework

- <u>Never</u> work more than 1 homework assignment ahead.
- You have unlimited tries of a problem, up to the deadline.
- Every student should be able to score a 100% on each homework assignment.

This course is based on Purdue University: Math152: College Algebra for Liberal Arts Copyright 2010 Pearson Education

If you would like to print the problem to take to class, to the Math Help Room, or to an instructor's (or coordinator's) office hours for help; click on Print. Only that problem will be printed.

O Trusted sites

Your OnlineTextbook

- You have a soft covered textbook. You also have an online textbook.
- From the menu: Click on Chapter Contents and select the chapter and lesson you want.
- (Or, there is a link to the textbook pages while working a homework problem.)

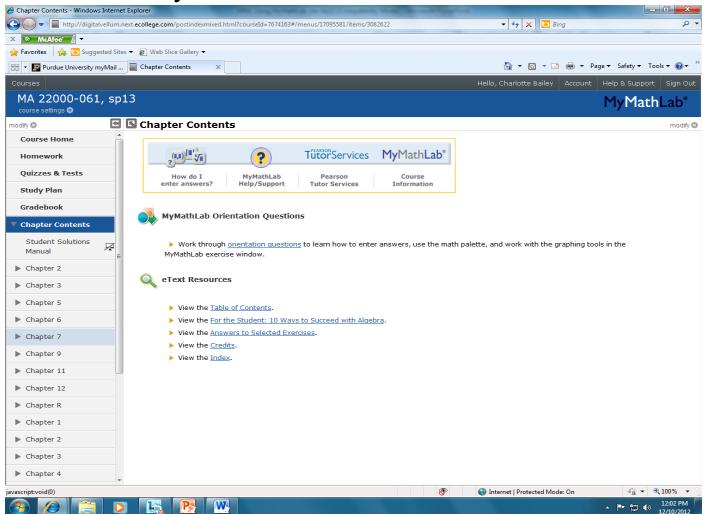

者 Start

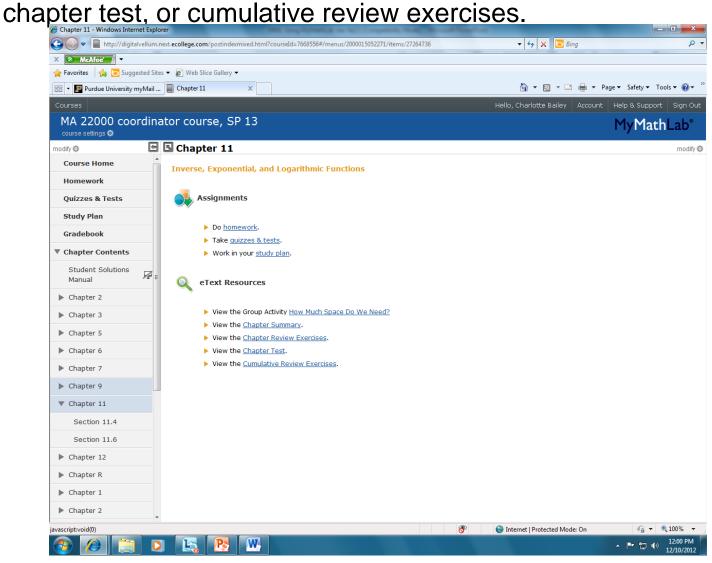

ڬ CourseCompass - Mo...

2

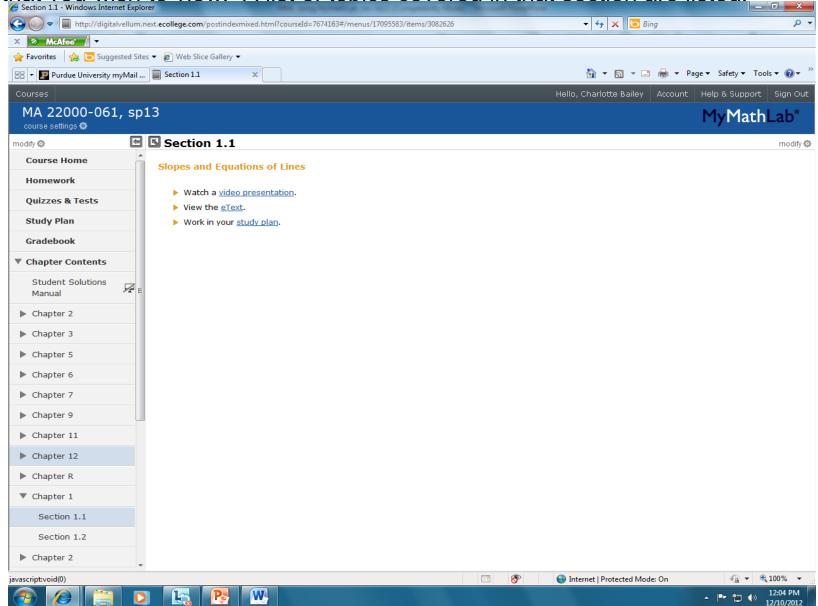

You will be given an opportunity to answer some orientation questions that may help you understand more clearly how MyMathLab operates. There is also a list of other resources that you can view.

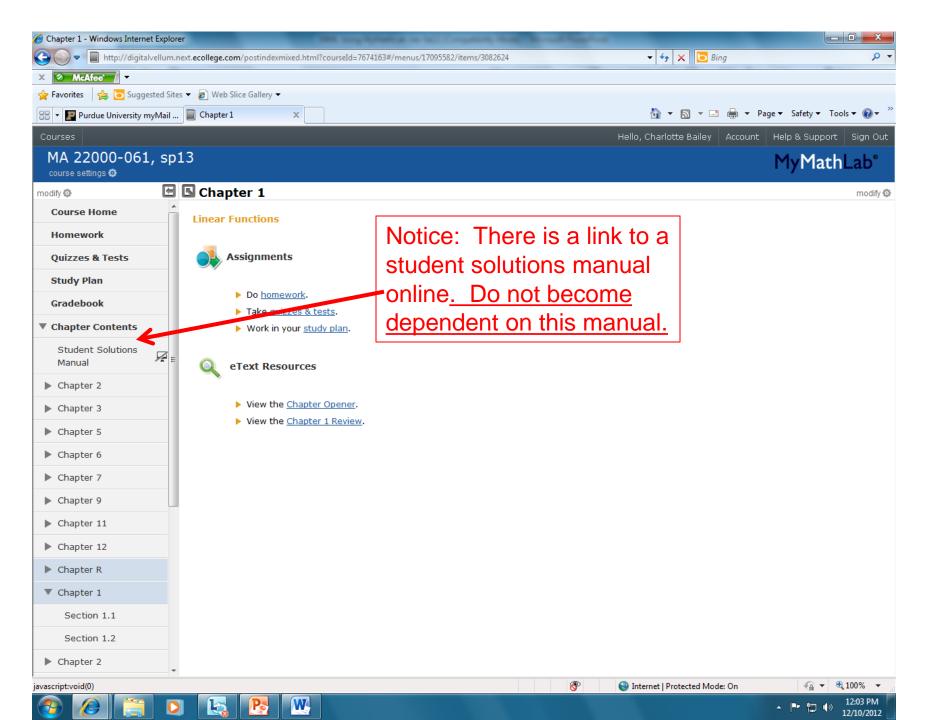

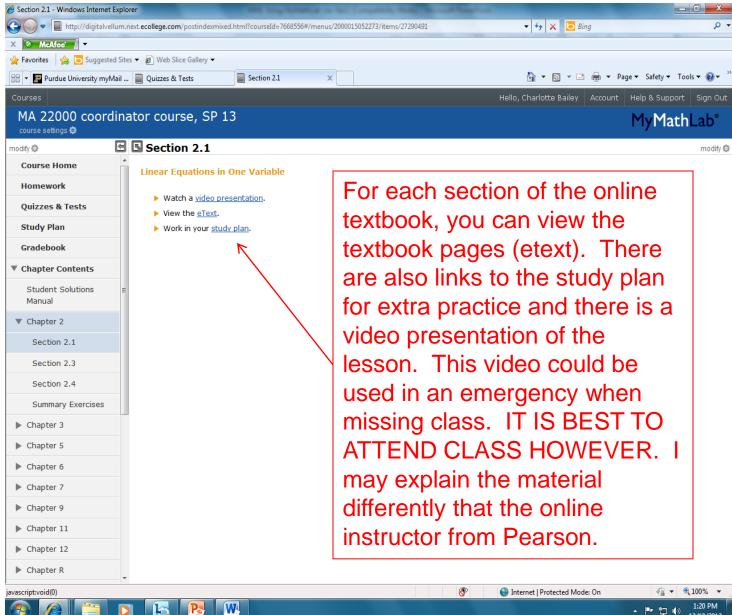

You will have a drop down menu that lists all chapters. Select the chapter of the lesson you want to view. Notice on this page, it also gives the options of going to homework, quizzes or tests, or the study plan. You can also go to the chapter summary, review exercises,

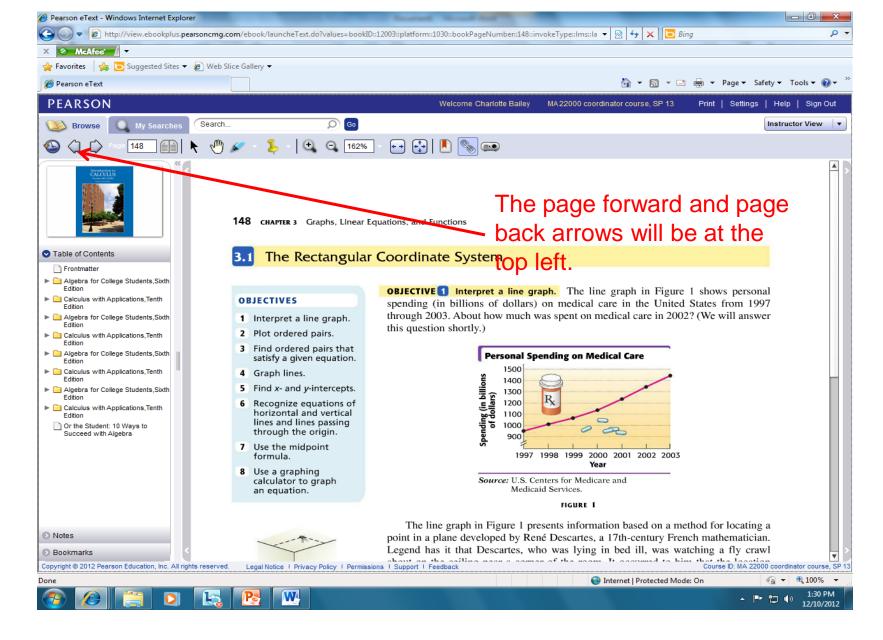

After selecting a chapter, you will then have to select a lesson from that chapter that you wish to view. A list of topics covered in that section are listed.

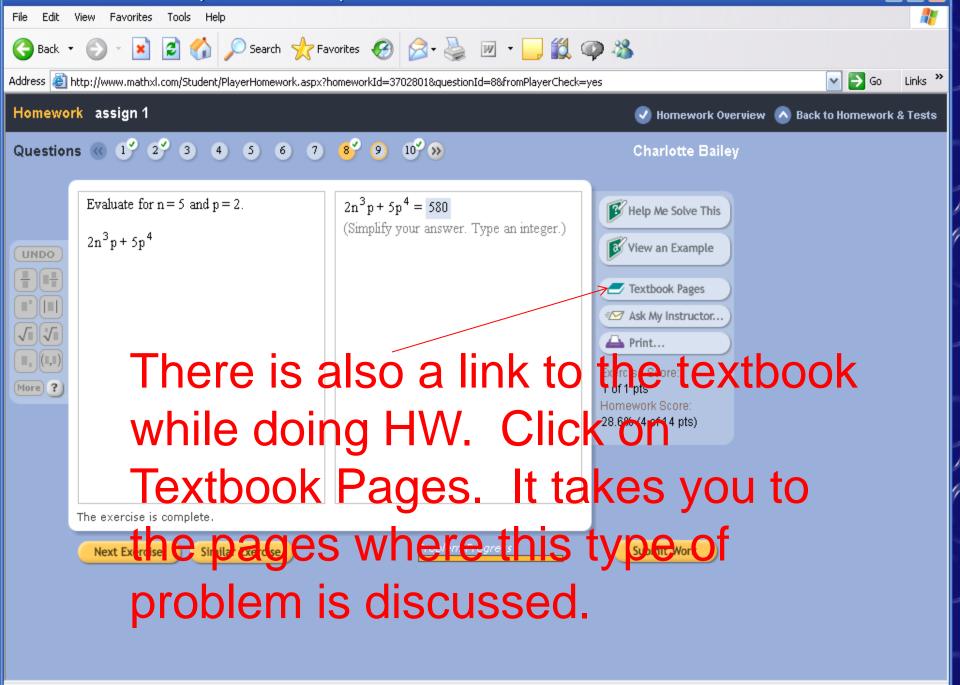

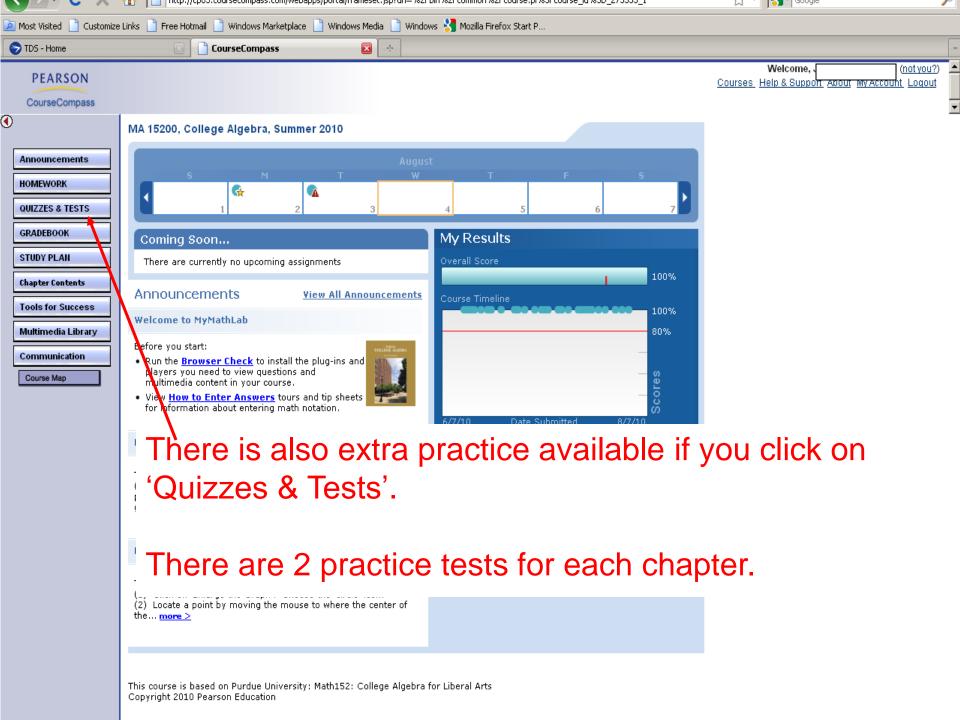

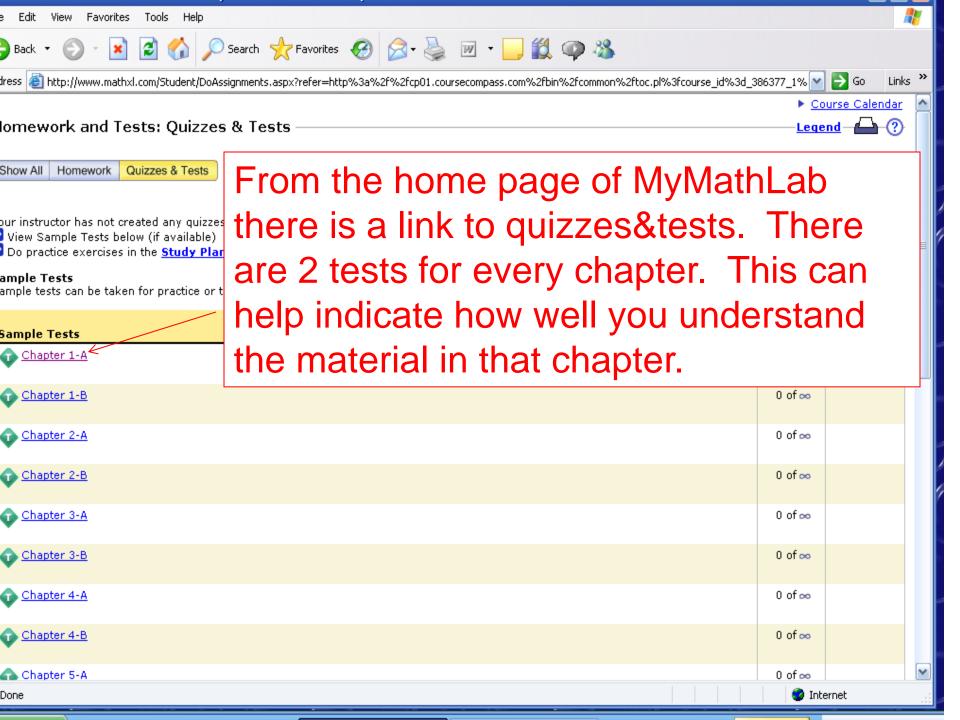

You can access all textbook pages from this site!!

Practice Tests

- There are two practice texts for each chapter.
- One can be used as a pre-test and one as a post-test.
- The scores you receive for these practice texts do not count for or against your grade.
