

Text: Algebra and Trigonometry with Analytic Geometry by Swokowski/Cole, Classic Tenth Edition, Brooks/Cole (2003).

A calculator which has square roots, trigonometric and logarithmic functions and their inverses is required. Only **non-programmable, non-graphing** scientific calculators are allowed for quizzes and exams. Cell phones and PDA's cannot be used as calculators, nor can calculators be shared. Calculators may be used for all problems below *except* those where you are asked to find an exact value or where calculators are explicitly forbidden. All handwritten homework should be written clearly, with sufficient work shown to justify the answer.
