Subject: NSF Program Deadlines

Below is a list of the program deadlines for NSF for the coming Fall Semester.

Please be aware that the University increased its equipment capitalization level from \$2,500 to \$5,000 effective July 1, 2009. Items which cost \$5,000 or more and expected to be used for more than one year will be defined as capital equipment. Any items less than \$5,000 will be considered supply items. Funding requests with proposed start dates of July 1, 2009 or after will need to utilize the new capitalization level in proposal budgets.

During the Fall Semester a large number of proposals are submitted through the Mathematics/Statistics Business Office. Please contact Amy Decker as early as possible about preparing the budget for your proposal.
