Title: "On Polynomial Maps"

Date: Tuesday, September 15, 2009

Time: 4:30 P.M.

Place: MATH 175

Abstract

I will give a survey on polynomial maps from \mathbb{C}^2 to \mathbb{C} and to \mathbb{C}^2 and explain that interesting invariants can be computed using a finite number of Newton polygons.

Refreshments will be served in the Math Library Lounge at 4:00 p.m.
