

Homework Tips
MA 35100 - Section 061

- Problems will come from the 4th edition of the textbook as well as problems not in the textbook. Homework is due at the beginning of class on the due dates.
- There are **True/False** questions designed to test your grasp of certain definitions, concepts, or theorems. These types of questions require a plausible *justification* of your answer either in the form of a short explanation, an example, or a counterexample. Simply writing “**True**” is not sufficient.
- Calculators or computers are not needed on the homework sets unless specifically stated. (Calculators are not needed in this course.)
- You may discuss problems with classmates but turn in your own work, otherwise it is considered cheating.
- To help our grader, please fold your homework paper lengthwise (long side) and on the outside page write your *Last Name, First Name, and Section Number (061)*.
