Hui Tan *University of California San Diego*

Georgios Tsikalas *Washington University St. Louis*

Matthew Wiersma *University of Winnipeg*

Rufus Willett *University of Hawaii*

Zhizhang Xie *Texas A&M University*

The Wabash Seminar and Mini-Conference series brings together the community of researchers working in modern analysis in the Midwest region, along with established researchers from farther afield, in order to stimulate fruitful interactions and encourage collaboration among researchers working in different areas of modern mathematical analysis. The Wabash series is jointly organized by researchers from Indiana University, IUPUI, Purdue University, and the University of Illinois at Urbana-Champaign.

Organizers: Hari Bercovici / Marius Junge / Bogdan Nica / Daniel Ramras / Thomas Sinclair
