MA 153
Exam 2 Information
BRING YOUR STUDENT ID TO THE EXAM WITH YOU

Exam 2 is Monday, October 14 starting at 6:30 pm. It is a one-hour exam. The exam will cover Lessons 11-20 (including both lessons 11 and 20). There will be 15 total questions on the exam. It is a multiple-choice, machine-graded exam. There is no partial credit on any question.

Location: The exam will be held in the Elliott Hall of Music (the main floor and the balcony). Make sure that you know where your instructor sections are sitting. You must sit with your instructor's section(s). Please see your instructor for the aisle and row numbers.

You will be given a question sheet and a scantron sheet. Only the scantron sheet will be graded, so it is very important that you have filled in the correct name, student ID number, section number (see your instructor) and that you have answered all questions (including all bubbles for the above information).

The only formulas provided on the exam are the volume of a right circular cylinder, volume of a sphere, and surface area of a cone. You are responsible for knowing all other formulas used on homework problems.

**Bring a scientific calculator with you to the exam. You will not be allowed to use a graphing or programmable calculator, so do not bring one.** If you forget your calculator or the batteries run down, you will have to work the exam without a calculator. There will not be one for you to borrow and you may not use your neighbor's.

**Optional Review Problems for Exam 2:**
Page 120: #7, 13, 15, 18, 21, 24, 28, 29, 32, 34, 38, 40, 45, 49, 50, 52, 53, 71, 72, 75;  
Page 222: #3, 4, 6, 7, 9, 11, 16, 18, 29, 33, 35, 38, 80, 81;

You may also print old exams from the MA 153 web page (answers are also available). The review problems and old exams are a good review for the exam you will be taking; however, any type of problem covered by your homework is a possibility for the exam. Also remember that the coverage on your exam may be different than the coverage on old exams.
