# MA 16010 -- CALCULATOR POLICY

A one-line scientific calculator is required. TI-30Xa is recommended. No graphing calculators. No calculators with two or more lines.

A **one-line** display shows what you type in and the answer on the <u>same</u> line. A simple check is to type in "2 + 2" and then hit "=". The only thing you should see is the number 4.
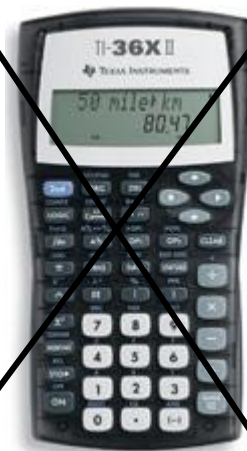

OK	OK	OK	NO

NO	NO
