

MA 154 Exam 3 Memo, Summer 2008

1. Exam 3 is during the regular class time on Monday, July 21 in **PHYS 223**.
2. You will have the whole 60 minutes to complete the exam. If you arrive late to class, you will only have the remaining minutes of class time to complete the exam.
3. The day prior to the exam (Friday, July 18) is a review class. The following problems will be good review problems to discuss on that day. (Other questions, such as ones from old exams or homework, may be asked as well.) **The chapter review problems may not be entirely inclusive. I highly recommend you review homework problems that vary from the review problems I've listed below and study some problems from the old exams.**
 - Chapter 8 review (p. 557): 2, 3, 4, 7, 11(a-d), 12(a-c), 14, 15, 16, 19, 20(a,b), 40, 42, 43, 45
 - Chapter 4 review (p. 273): 30, 32, 36, 40
4. The only calculator allowed is a TI 30 **one-liner**. (See picture of calculator on the course web site.)
5. The formulas that will be provided are found on the formula sheet located under resources on the course web site.
6. If you cannot take the regular exam because of an extenuating circumstance that you are aware of prior to that day, you must notify Charlotte within 24 hours prior to the exam. You must meet with her in MATH 802, to make arrangements to take an alternate exam.
7. If an emergency occurs, which prevents you from taking the regular exam; you must see Charlotte in MATH 802, as soon as possible. Do not leave a message on her voice mail. You may send an email message to explain what has happened to her. If your reason for missing the exam is not valid or documentable, you may receive a grade penalty.
8. Lessons covered on the exam include lessons 18 through 24. Sections in the book are 8.1 – 8.4 and 4.5.
9. Exams from previous semesters are available on the course web site. However, these problems are multiple-choice and your exam will only be partially multiple-choice. These problems may also not represent every type of problem that may appear on your exam. They are good for review purposes, but are not a guarantee of what may or may not appear on your exam.
10. You need to bring pencils, **your calculator**, and/or an eraser with you.
