36		REVIEW FOR THE FINAL EXAM

GRADES: Homework and quizzes combined are worth 100 points. Each of the three exams during the semester is worth 100 points, and the final exam is worth 200 points. Students earn a TOTAL SCORE for the semester, which is a number between 0 and 600. The final exam is a 25-question multiple choice, machine graded exam.

At the end of the semester, each student's grade is calculated using his/her TOTAL SCORE. The final grades are calculated as follows: The TOTAL SCORES for each class are listed in numerical order, highest first. Then, each instructor uses the letter grades earned by his/her students on the common final exam to determine cut-offs for letter grades for these total scores. For example, if ten students in the class receive an A on the final, the first 10 students on the total scores list will receive an A in the course and so on down the list for the other grades. Lastly, students within 8 points of a higher grade are considered borderline cases. For these cases, the work on the final exam is used to determine the most appropriate grade.

HOMEWORK AND QUIZZES: Homework will be collected regularly, graded, and returned. **Late homework will not be accepted.** There will be frequent quizzes. **No make-up quizzes will be given.**

ACADEMIC ADJUSTMENTS FOR STUDENTS WITH DISABILITIES: Students who have been certified by the Office of the Dean of Students-Adaptive Programs as eligible for **academic adjustments** should go to MATH 242 with a copy of their certification letter and request an *Information Sheet* for this Summer session, that explains how to proceed this Summer to have these adjustments made in mathematics courses. (Procedures are **not** the same as last Spring semester.) **This should be done during the first week of classes.** Only students who have been certified by the ODOS-Adaptive Programs and who have requested ODOS to send their certification letter to their instructor are eligible for academic adjustments.

Students who are currently undergoing an evaluation process to determine whether they are eligible for academic adjustments, are encouraged to find out **now** what procedures they will have to follow when they are certified, by requesting the above mentioned *Information Sheet* from MATH 242. Large print versions of the *Information Sheet* are available in MATH 242 upon request.

OFFICE HOURS: Each instructor and grader has common office hours. These are open to students from any section of MA 223 or 224. After the first week of classes, the common office hour schedule is posted on each instructor's and grader's door, and on the course web page. You are strongly urged to go to someone's office hours if you have questions. It is the best way to get individual help.

SECTION CHANGES AND DROPS: There are no section changes allowed during the first three days of classes. After that, **until July 9**, see the instructor of the section you want to enter. You will find the list of instructors for your course at the main desk in MATH 835 or on the course web page. The last day to drop a course (with passing or failing grade) is July 9. If you want to drop a course before then, your instructor can sign your drop form. If your instructor is not available, go to MATH 835. **No section changes or drops are allowed after July 9.**

QUESTIONS: If you have any questions that your instructor cannot answer, go to MATH 835 or call 494-1901.
