

MA 22400 – EXAM 2 INFORMATION

Exam 2 is an evening exam on Monday, October 26, at 8:00 p.m. in the Elliott Hall of Music. Your instructor will assign seats for your class and only he/she will know your assigned seat. (The course web page only shows the section where your class will be sitting.) If you arrive more than 30 minutes late, you will not be allowed to take the exam. Rather, you will have to get an alternate exam form from your instructor and will receive a 20 point penalty on the alternate exam (unless a documented emergency prevented you from arriving on time).

The exam consists of 12 multiple-choice questions and covers lessons 14-24. Note that “None of the above” is not used as a choice. You will have one hour and fifteen minutes to complete your work. The formulas provided on the exam are those dealing with the trapezoidal rule, the second derivative test, the least squares line and the method of Lagrange multipliers (see separate formula page link). Only a one-line calculator (any brand) may be used. Calculators cannot be shared and cell phones cannot be used as a calculator (they must be turned off and put away during the exam). **Only the scantron answer sheet will be graded**, so be very careful in coding your answer choices. No regrades will be allowed for miscoded or uncoded answer sheets.

Late the following Wednesday (or Thursday morning), your exam score will be available via a link on the course web page (not on Blackboard). Letter grade estimates will be announced in class and will also be available via a link on the course web page.

To request an alternate exam, you must see your instructor as soon as you know you will miss the exam, or have missed the exam. (Do not contact the course coordinator.) Do not wait to contact your instructor, or you may miss any opportunity for an alternate exam. If you will miss the exam due to a class or exam conflict, you will need to provide your schedule/exam date information. If you miss the exam due to serious personal illness or family emergency, you will need to provide documentation. If you miss the exam for another reason, you may be allowed to take an alternate, but it will be with a 20 point penalty.

The alternate exam will take place on Friday, October 30, at 6:30 p.m. You must obtain an alternate exam form (blue slip) from your instructor **and** take it to MATH 242 to sign up for the alternate.

Your instructor will provide a set of review problems. This is only one source of problems to review. Be sure that you also study all other work (homework problems, in-class examples, quizzes, etc.). You should also be aware that one or two problems on the exam may not be exactly like a homework problem. These problems are intended to see if you can apply what you have learned to a situation that is slightly different from what you have seen. A sample exam from last semester is available on the course web page. However, keep in mind that the exam may not cover exactly the same material as this semester’s exam (exam dates vary from semester to semester) and that the difficulty level may differ slightly.

Class on Friday, October 23, is not optional. However, class on Monday, October 26, is optional to compensate for the evening exam.
