

## MA 23100, MA 23200 – Calculators Fall 2009

A one-line scientific calculator with logarithmic and exponential functions is required. Graphing calculators and programmable calculators cannot be used. Calculators which are capable of numerical or symbolic differentiation or integration are considered programmable and are thus not allowed.

Only one-line scientific calculators are allowed in these courses. Any calculator that displays more than one line is not allowed. (If input is on one line and the answer is on a separate line, this is not a one-line calculator.)
