

For this project, please work in groups of 4. Everyone will turn in their own paper. Put your name at the top and the names of your other group members underneath. Bundle the group of papers to turn in. The survey questions and results should be the same for everyone in the group. The answers to the two questions at the end may be different.

I Write a survey question that uses categorical data.

Record your results in an easy-to-read format:

II Write a survey question that uses measurement data.

Record your results in an easy-to-read format:

Do you believe your results from question I are typical for all Ma13800 students? Why or why not?

Do you believe your results from question II are typical for all Purdue undergraduates? Why or why not?
