

MA 22100 FINAL EXAM INFORMATION

The final exam is scheduled for **Monday, 3 May, 7:00 pm -- 9:00 pm in LILY 1105**. The final exam is a 150 point, comprehensive, multiple-choice exam. There are 25 questions on the exam. The only formulas provided are those listed on the formula sheet on the course web page. Note that we do not use "none of the above" as an answer choice.

Please **bring photo ID** to the final. Without it, you may not be allowed to take the final. You will need to enter your name, 4-digit section number, and ten-digit Purdue ID number on the scantron to be sure your instructor receives your score on the final. Your instructor will announce the four digit section number in class and at the final.

Practice problems for the final are available on the course web page. However, do not focus solely on these problems to review. Be sure to also look at the homework problems, the quizzes, your instructor's examples from class and your midterm exams.

Remember to bring a one-line calculator to the final. You cannot share calculators at the final. Cell phones and all other electronic devices must be turned off and put away during the final.

There is no partial credit on the exam. However, you should show all of your work on every problem and circle your answer on the exam itself. In the unlikely event that anything happens to your scantron, the exam will be used as a backup. No regrades will be allowed for miscoded answer sheets.

Final exam scores and letter grade estimates will be available via the course web page by the end of exam week. Course grades will be available on myPurdue on Wednesday, 12 May.

If you need to request an alternate final, please contact your instructor as soon as possible. The only guaranteed reasons for an alternate final without penalty are three finals in one day, two finals at the same time, special ADA cases, documented personal illness or documented family emergency. In some cases, an alternate final may not be allowed at all.
