

## Online Homework Information

There are 3 PowerPoints found under online homework on the course web page. If you have used CourseCompass before, select the PowerPoint on enrolling in another class and follow the directions. If you have never used CourseCompass before, select the PowerPoint for registration and follow its directions. **All students** need to view the PowerPoint describing the features of CourseCompass.

- 1) To **register for the first time** (if you've never used CourseCompass for math online homework), go to the Registration for CourseCompass PowerPoint presentation and follow the steps. The first slide describes what you will need.
- 2) If you used CourseCompass for online homework in the **past** and need to enroll in another class, go to the Enroll in a CourseCompass class PowerPoint presentation and follow the steps.
- 3) To understand how to complete the online homework and how to use other features of CourseCompass, use the PowerPoint to guide you through the **features of CourseCompass**.

### Homework Information:

1. The deadline for homework on a certain day is posted on the home page (the page after you click on your class). Upcoming deadlines for the 3 next homework assignments are listed.
2. Your first homework assignment is a tutorial of how to enter answers. You will have the entire semester to finish this assignment. This assignment score will be omitted at the end of the semester.
3. Never work more than one homework assignment ahead of schedule.
4. You do not have to work all problems of a homework assignment in one setting. You do not have to complete the problems in consecutive order.

You can return later to finish the assignment. If you log out, your correct answers are saved.

5. You may try a problem as many times as necessary (up to the deadline) until you get the answer correct. If you get an incorrect answer three times in a row, there may be another problem generated for you to try.
6. The homework overview will show which problems you have correct and which you need to finish before the deadline.
7. If you need help, try the links at the right of the problem. However, do not depend on these links all of the time. If you do use a guided solution or view a similar problem, I recommend clicking on 'similar example' and try another problem.
8. There is a toolbox at the left of each problem with symbols to help you enter answers. If you do not see the tool you want, click on 'more'.
9. If you make a mistake entering an answer, click on 'clear answer' and start over. After entering an answer, click on check answer. If the answer is incorrect, try again or try one of the 'helps'.
10. Once you are ready to log out, you may click on 'save'. However, your answers will be saved, even if you do not click 'save'.
11. If you email your instructor, allow 24 hours for that instructor to reply.
12. Homework is always due at 3 PM on the afternoon of the next class day. An exception is a review day. Then the homework is due on the exam day.
13. The online homework problems' numbering will not match the numbering from the textbook. A number 5 on the online problems could be a number 33 from the textbook.
