Message 4

Hello!

The course web page has all of the information for this course. It includes course information, resources, exam information, instructor information, lesson notes, online homework information, etc.

Address:

www.math.purdue.edu/MA11100

I encourage you to view the page.

As the instructor of this class, I use the lesson notes that are provided on the course web page. You are encouraged to print them off before each class and bring them to class with you. You should print off the lesson 1 notes for Monday.

I also recommend students take the textbook pages for the appropriate lesson(s) with you to class. Since the textbook is in a 3-ring binder, it is easy to remove the pages and take to class. You are encouraged to highlight, underline, or circle on these pages. Some students find it helpful to keep the pages in a pocket folder; either a chapter at a time or lessons for an exam at a time.

Previous messages, along with this message, will be found on the course web page.

Charlotte Bailey

MA 111 coordinator and instructor
