

Find a video on YouTube that addresses the idea of symmetry – either for 2 dimensions or 3 as we have been studying in lessons 9 and 10. The video should be one that you would use in a 6th grade classroom because it is interesting or clearly explains and demonstrates the concepts. For the quiz, write

Name of video:

Name/ID of person submitting video:

Specific geometry concept shown:

Two specific reasons why you think this would be valuable for 6th grade students to watch:
