

MA15300Y WebAssign Homework Bonus

Any homework problems that are successfully completed at least 6 hours before the deadline will receive a 10% bonus (for instance, a score of 80% becomes an 88%). Students can still complete any remaining problems before the deadline to improve their scores, but they will NOT receive any additional bonus.

Example: The Lesson 1 homework assignment is due on Thursday, August 23 at 5:59AM. Any problems from the Lesson 1 assignment that are successfully completed by Wednesday, August 22 at 11:59PM (6 hours before the deadline) will receive a 10% bonus. After that, students will still have 6 hours to complete the assignment before the deadline, but they can no longer receive bonus points on that assignment.

There will be no bonus on any of the online quizzes.

MA15300Y WebAssign Homework Penalty

Most multiple choice problems will include a penalty for an incorrect response. If a multiple choice question has only two options, a 50% penalty will be enforced for answering the question incorrectly on the first try. For multiple choice questions with more than two options, students receive one free attempt, and then a 50% penalty is enforced for answering the question incorrectly on the second try.

Example: If a multiple choice question has only two options, and a student selects the incorrect option on their first attempt, the student can re-attempt the problem to select the other option, but they will only receive half-credit for the correct answer on their second attempt. If a multiple choice question has three (or more) options, and a student selects an incorrect option on their first attempt, the student can re-attempt the problem to select one of the other options WITHOUT penalty. If the student selects an incorrect option on their second attempt, they can re-attempt the problem again, but the most they can receive for a correct answer is half-credit.

Each problem from the online quizzes will have only one attempt, so there will be no multiple choice penalty.
