Message 4

Hello!

The course web page has all of the information for this course. It includes course information, resources, exam information, instructor information, lesson notes, online homework information, etc.

Addresses:

www.math.purdue.edu/MA15200 (for day classes)

www.math.purdue.edu/MA15200x (for the Tuesday evening class)

I encourage you to view this page.

Some instructors use the lesson notes that are found on this page. My class(s) could definitely use the notes. I know the instructor of the Tuesday evening class uses these notes. If your instructor uses the notes, you are encouraged to print them off and bring to class.

I also recommend students take the textbook pages for the appropriate lesson(s) with you to class. Since the textbook is in a 3-ring binder, it is easy to remove the pages and take the class. You are encouraged to highlight, underline, or circle information on these pages. Some students find it helpful to keep the pages in a pocket folder; either a chapter at a time or lessons for an exam at a time.

Previous messages, along with this message, will be found on the course web page.

Charlotte Bailey

MA 15200 and MA 15200X coordinator
