

## MA15300 WebAssign Homework Bonus

Each class a lesson is taught, a homework assignment covering that lesson will be due 6 hours after the start of the next class. Any problems that are successfully completed before the next class begins will receive a 10% bonus (for instance, a score of 80% becomes an 88%). Students can still complete any remaining problems before the deadline to improve their scores, but they will NOT receive any additional bonus.

Example: Lesson 1 will be covered on the first day of class (Monday, August 19). The due date for the Lesson 1 homework assignment will be 6 after the **START** of the next class (Wednesday, August 21). Students will receive a 10% bonus on any problems that are successfully completed before the start of Wednesday's class. After Wednesday's class, students will still have 5 hours to complete the assignment before the deadline, but they can no longer receive bonus points on that assignment.

## MA15300 WebAssign Homework Penalty

Most multiple choice problems will include a penalty for an incorrect response. If a multiple choice question has only two options, a 50% penalty will be enforced for answering the question incorrectly on the first try. For multiple choice questions with more than two options, students receive one free attempt, and then a 50% penalty is enforced for answering the question incorrectly on the second try.

Example: If a multiple choice question has only two options, and a student selects the incorrect option on their first attempt, the student can re-attempt the problem to select the other option, but they will only receive half-credit for the correct answer on their second attempt. If a multiple choice question has three (or more) options, and a student selects an incorrect option on their first attempt, the student can re-attempt the problem to select one of the other options **WITHOUT** penalty. If the student selects an incorrect option on their second attempt, they can re-attempt the problem again, but the most they can receive for a correct answer is half-credit.
