

MA 15300X (Tuesday Only) WebAssign Homework Bonus

Each class a lesson is taught, a homework assignment covering that lesson will be due 6 hours after the start of the next class. Any problems that are successfully completed before the next class begins will receive a 10% bonus (for instance, a score of 80% becomes an 88%). Students can still complete any remaining problems before the deadline to improve their scores, but they will NOT receive any additional bonus.

Example: Lesson 1 will be covered on the first day of class (Tuesday, January 8). The due date for the Lesson 1 homework assignment will be 6 after the **START** of the next class (Tuesday, January 15). Students will receive a 10% bonus on any problems that are successfully completed before the start of class on Tuesday the 15th. After class on Tuesday the 15th, students will still about 3 hours to complete the assignment before the deadline, but they can no longer receive bonus points on that assignment.

MA 15300X (Tuesday Only) WebAssign Homework Penalty

Most multiple choice problems will include a penalty for an incorrect response. If a multiple choice question has only two options, a 50% penalty will be enforced for answering the question incorrectly on the first try. For multiple choice questions with more than two options, students receive one free attempt, and then a 50% penalty is enforced for answering the question incorrectly on the second try.

Example: If a multiple choice question has only two options, and a student selects the incorrect option on their first attempt, the student can re-attempt the problem to select the other option, but they will only receive half-credit for the correct answer on their second attempt. If a multiple choice question has three (or more) options, and a student selects an incorrect option on their first attempt, the student can re-attempt the problem to select one of the other options **WITHOUT** penalty. If the student selects an incorrect option on their second attempt, they can re-attempt the problem again, but the most they can receive for a correct answer is half-credit.
