

**** Exam 3 is an evening exam on Thursday, April 11, at 8:00 p.m.(90 minute exam) in the Elliott Hall of Music.** Your instructor will assign seats for your class and only he/she will know your assigned seat. (The course web page only shows the section where your class will be sitting.) If you arrive more than 30 minutes late, you will not be allowed to take the exam. Rather, you will have to get an alternate exam form from your instructor and will receive a 20 point penalty on the alternate exam (unless a documented emergency prevented you from arriving on time).

The exam consists of 15 multiple-choice questions and covers Lessons 27-36 from the Assignment Sheet on the MA223 webpage. You will have **one hour and thirty minutes** to complete your work. **The formulas provided on the exam** are the volume and surface area formulas for a right circular cylinder, sphere, and right circular cone, **and also** the two Interest Formulas from Section 4.1(these formulas will be on the exam cover page).

Only a one-line calculator may be used. Calculators cannot be shared and cell phones cannot be used as a calculator (they must be turned off and put away during the exam). **Only the scantron answer sheet will be graded**, so be very careful in coding your answer choices. No regrades will be allowed for miscoded or uncoded answer sheets.

Bring your Purdue student ID to all the exams.

The exam is self-explanatory. Instructors are not allowed to interpret any of the questions for any of their students. Further, students should never ask an instructor to interpret a question. Period.

Hopefully by Monday, 4/15, your official exam score will be available via a link on the course web page (not on Blackboard). Letter grade estimates will be announced in class and will also be available via a link on the course web page.

To request an alternate exam, you must see your instructor as soon as you know you will miss the exam, or have missed the exam. (Do not contact the course coordinator.) Do not wait to contact your instructor, or you may miss any opportunity for an alternate exam. If you will miss the exam due to a class or exam conflict, you will need to provide your schedule/exam date information. If you miss the exam due to serious personal illness or family emergency, you will need to provide documentation. If you miss the exam for another reason, you may be allowed to take an alternate, but it will be with a 20 point penalty.

The alternate exam will take place on Friday, April 19, at 6:00 p.m. You must obtain an alternate exam form (blue slip) from your instructor **and then** take it to MATH 242 to complete your sign up for the alternate exam.

Your instructor will provide a set of review problems. This is only one source of review problems. **THE PROBLEMS on the ASSIGNMENT SHEET on the course webpage is best source of what topics and type of problems to expect.** Be sure that you also study all other work (homework problems, in-class examples, quizzes, etc.). **You should also be aware that a few problems on the exam may not be exactly like a homework problem. These problems are intended to see if you can apply what you have learned to a situation that is slightly different from what you have seen.** There are some problems from the Final Exam Practice questions(#’s 9, 18-23, 25, 31, 33, 34) available on the course web page(**NOTE: These questions are simply a few extra practice problems**).

Class on Wednesday, April 10, is not optional and there might be a quiz that day. However, class on Friday, April 12, is optional to compensate for the evening exam.
