

****NOTE: Final Exam Rooms: ME 1012 & ME 1052****
The Final Exam is Thursday, 8/1 at 3:30PM (2 hour exam)

The Final Exam will be 25 multiple-choice questions.

The Final Exam is comprehensive...

You should know the topics and material we covered from Appendices A to D and Chapter 1. However, the **Final Exam will highly emphasize the topics and problems from Chapters 2, 3, 4, and 5. In particular, since Chapter 5 was not covered on Exam 3, do expect a slight emphasis on that material.**

The Assignment Sheet is located on the webpage:

www.math.purdue.edu/MA16100

****The homework problems from the textbook listed on the Assignment Sheet describe the coverage of material you should expect to see on the Final Exam. Also, make note of problems and types of problems emphasized in lectures. So, working textbook problems like the homework problems should be your priority in preparing for the exam.**

NOTE: You only have access in the back of the textbook to the answers to the odd-numbered problems, so your focus should be on those problems where you can readily check your answers. This is also true for the extra review problems listed below.

There is also a small set of "Practice Final Problems & Answers" located on the MA16100 website:

www.math.purdue.edu/MA16100

This small set of practice problems **is not** a comprehensive list of the problems and topics we have covered.

EXTRA REVIEW PROBLEMS

****Note: These review problems are also only a sampling of what we have done.** Again, the homework problems listed on the Assignment Sheet describe the overall coverage of material you should expect to see or use on the Final Exam.

Use the Odd-numbered problems below:

p.74 – 1a-f, 3 to 15, 19, 23, 25ab

p.167 – 1 to 19, 23, 29, 31, 35 to 49

p.265 – 1 to 25, 29, 31, 35, 37, 39, 43, 45, 49, 51, 57 to 65, 69 to 75, 79 to 85, 89, 93 to 101, 105

p.352 – 1 to 19, 23 to 29, 33, 55 to 61, 65 to 73

p.409 – 1 to 19, 23 to 37, 43, 45, 49, 55, 57, 59

NOTE: Read other NOTE above about utilizing odd-numbered versus even-numbered problems.

There are also past MA16100 Exams you can get through Exam Archives on the 16100 website:

www.math.purdue.edu/MA16100

The more recent exams will likely be more relevant for our purposes.
