

**** Exam 2 is an evening exam on Monday, October 27, at 8:00 p.m.(90 minute exam) Location: SAME ROOM AS EXAM 1, a reminder will be sent you in an email. The Course Coordinator will assign NEW seat assignments for each student.** If you arrive more than 30 minutes late, you will not be allowed to take the exam. Rather, you will have to get an alternate exam form from your instructor and will receive a 25 point penalty on the alternate exam (unless a documented emergency prevented you from arriving on time).

The exam consists of 15 multiple-choice questions and covers Lessons 11-24 from the Assignment Sheet on the MA224 webpage. Note that “None of the above” is not used as an answer choice. You will have **one hour and thirty minutes** to complete your work. The only formulas provided on the exam are on the webpage www.math.purdue.edu/MA22400 .

Only a one-line calculator may be used. Calculators cannot be shared and cell phones cannot be used as a calculator (they must be turned off and put away during the exam). **Only the scantron answer sheet will be graded**, so be very careful in coding your answer choices. No regrades will be allowed for miscoded or uncoded answer sheets.

Bring your Purdue student ID to all the exams.

The exam is self-explanatory. Instructors are not allowed to interpret any of the questions for any of their students. Further, students should never ask an instructor to interpret a question. Period.

Hopefully by Wednesday, 10/29, your exam score will be available in Blackboard. Letter grade estimates will be available via a link on the course web page.

To request an alternate exam, you must see your instructor as soon as you know you will miss the exam, or have missed the exam. (Do not contact the course coordinator.) Do not wait to contact your instructor, or you may miss any opportunity for an alternate exam. If you will miss the exam due to a direct class or direct exam conflict, you will need to provide/show your schedule/exam date information. If you miss the exam due to serious personal illness or family emergency, you will need to provide documentation. If you miss the exam for another reason, you may be allowed to take an alternate, but it will be with a 25 point penalty.

The alternate exam will take place on Friday, October 24, at 6:00 p.m. You must obtain an alternate exam form (blue slip) from your instructor **and** then take it to MATH 242 to complete the sign up for the alternate exam.

The Course Coordinator will provide a set of review problems. This is only one source of review problems. **THE PROBLEMS on the ASSIGNMENT SHEET on the course webpage are the best source of what topics and type of problems to expect.** Be sure that you also study all other work(homework problems, in-class examples, quizzes, etc.). **You should also be aware that a few problems on the exam may not be exactly like a homework problem. These problems are intended to see if you can apply what you have learned to a situation that is slightly different from what you have seen.** There are a few problems from two previous semester’s Exam 1’s, Fall 2013 Exam 1(#9,13-15) and Spring 2014 Exam 1(#5,10). ALSO, There are some problems from the previous semester’s Fall 2013 Exam 2(ALL PROBLEMS), Spring 2014 Exam 2 (ALL PROBLEMS) and Final Exam Practice questions(#’s 5-17, 23, 26, 28) available on the course web page(**NOTE: These old Exam questions are simply a few extra practice problems**).

All these problems are available through the course web page.

Class on Friday, October 24, is not optional and there might be a quiz that day. However, class on Monday, October 27, is completely optional to compensate for the evening exam.
