

## MA 22000 Final Exam Information, Spring 2014

The final exam is scheduled for **Tuesday, May 6th, at 7:00 PM (7:00 PM – 9:00 PM) in Elliott Hall of Music**. Seats are assigned and you should receive your assigned seat from Charlotte by the end of ‘dead’ week (week prior to finals week, via email). The table with assigned rows/seats will be sent to all students via the Purdue email system.

The final exam is a 150 point, comprehensive, multiple-choice exam. There are 25 questions on the exam and you will have two hours to complete it. The only formulas provided are those that have been provided on previous exams this semester. These formulas include the compound interest formulas, the quadratic formula, the slope formula, the slope-intercept form of a line, and the point-slope form of a line. Note that we rarely use ‘none of the above’ as an answer choice.

Please bring to the exam: **a photo ID (preferably your Purdue ID), pencils, erasers, and your 1-line scientific calculator**. Without your photo ID, you may not be allowed to take the final. Further, you will need to code your ten-digit Purdue ID number on the scantron answer sheet, to insure that Charlotte receives your score for the final exam.

Practice problems for the final (practice final exam) are available on the course web page. However, **do not focus solely** on these problems to review. Be sure to also look at the homework problems, the quizzes from this semester, instructor examples from class (lesson notes), and your mid-term exams’ questions (exams 1, 2, and 3).

Remember to bring a one-line scientific calculator to the final. Students cannot share calculators at the final, and cell phones cannot be used as calculators. (In fact, cell phones must be turned off and put away during the final exam.)

There is no partial credit on the exam. However, you should circle your answer on the exam itself. In the unlikely event that anything happens to your answer sheet, the exam will be used as a backup. (However, note that no re-grades will be allowed for miscoded answer sheets.) **You will not keep this exam; it must be turned in with your answer sheet.**

At the end of the final, you will turn in **both** your answer sheet and the exam itself to your instructor. If all goes well, final exam scores and exam letter grade estimates will be determined by late Friday or early Monday. Course grades will not be available until early in the week after Finals’ week and are only available from your instructor (or through MyPurdue).

If you need to request an alternate final, please contact the course coordinator (Charlotte Bailey, MATH 802) as soon as possible. The only guaranteed reasons for an alternate final without penalty are more than two scheduled finals in one day, two finals at the same time, special ADA cases, and documented personal illness or documented family emergency. In some cases, an alternate final may not be allowed at all.
