

**** Exam 1 is an evening exam on Monday, February 10, at 8:00 p.m.(90 minute exam) in the Elliott Hall of Music.** The course coordinator will assign seats for each student. (The course web page will show the section of the exam room where your Classroom Instructor's students will be sitting.) If you arrive more than 30 minutes late, you will not be allowed to take the exam. Rather, you will have to get an alternate exam form from your instructor and will receive a 20 point penalty on the alternate exam (unless a documented emergency prevented you from arriving on time).

The exam consists of 15 multiple-choice questions and covers Lessons 2-10 from the Assignment Sheet on the MA223 webpage. Note that "None of the above" is not used as a answer choice. You will have **one hour and thirty minutes** to complete your work. The only formulas provided on the exam will be on the webpage www.math.purdue.edu/MA22300 .

Only a one-line calculator may be used. Calculators cannot be shared and cell phones cannot be used as a calculator (they must be turned off and put away during the exam). **Only the scantron answer sheet will be graded**, so be very careful in coding your answer choices. No regrades will be allowed for miscoded or uncoded answer sheets.

Bring your Purdue student ID to all the exams.

The exam is self-explanatory. Instructors are not allowed to interpret any of the questions for any of their students. Further, students should never ask an instructor to interpret a question. Period.

Hopefully by Wednesday, 2/12, or Thursday, 2/13, your exam score will be available in Blackboard. Letter grade estimates will be announced in class and will also be available via a link on the course web page.

To request an alternate exam, you must see your instructor as soon as you know you will miss the exam, or have missed the exam. (Do not contact the course coordinator.) Do not wait to contact your instructor, or you may miss any opportunity for an alternate exam. If you will miss the exam due to a direct class or direct exam conflict, you will need to provide/show your schedule/exam date information. If you miss the exam due to serious personal illness or family emergency, you will need to provide documentation. If you miss the exam for another reason, you may be allowed to take an alternate, but it will be with a 20 point penalty.

The alternate exam will take place on Friday, February 14, at 6:00 p.m. You must obtain an alternate exam form (blue slip) from your instructor **and** then take it to MATH 242 to complete the sign up for the alternate exam.

Your instructor will provide a set of review problems. This is only one source of review problems. **THE PROBLEMS on the ASSIGNMENT SHEET on the course webpage are the best source of what topics and type of problems to expect.** Be sure that you also study all other work(homework problems, in-class examples, quizzes, etc.). You should also be aware that a few problems on the exam may not be exactly like a homework problem. These problems are intended to see if you can apply what you have learned to a situation that is slightly different from what you have seen. There are some problems from two previous semester's Exam 1's, use all of Fall 2013 Exam 1 and from Spring 2013 Exam 1(#'s 1, 2, 4-9, 11, 12, 14) Additionally, Final Exam Practice questions(#'s 1-8, 10, 25, 33) are also applicable to this Exam 1. All these problems are available on the course web page.

Class on Friday, February 7, is not optional and there might be a quiz that day. However, class on Monday, February 10, is optional to compensate for the evening exam.
