

Text: Algebra and Trigonometry with Analytic Geometry by Swokowski / Cole, Classic Twelfth Edition, Brooks / Cole (2010).

A one-line, TI-30XA scientific calculator, is the only calculator allowed on quizzes and exams. No other calculator is allowed. It does not matter what you used before of if you agree with the policy.

All 40 lessons have been recorded in PowerPoint, with Mr. Delworth narrating how to work each problem, and are accessible in YouTube. This is not a substitute for attending class; however, it might be helpful in understanding the material. The link to the YouTube videos is available on the summer schedule.

This is a list of the homework problems that will be completed in the online homework system WebAssign. Information about WebAssign is on the course web page.
