

Due TUESDAY, April 7, 2015 by 2:00 pm. Note the time. You may turn it in on Monday. ☺

Prepare a problem that could be used on a Math 13900 exam covering an important idea from section 22.5. Your problem should not be a simple question with a short answer. Instead, prepare a problem that involves multiple parts or multiple answers. The goal here is that your problem should be substantial, but not complicated.

Include your complete answer.

Your quiz will be graded on:

- Is it clear? – Could any student know exactly what you are asking?
- Is your answer correct?
- Is it more than just a simple question?
- Is the level appropriate for a Math 13900 question?

Quiz 12
