

MA 16010 -- CALCULATOR POLICY

A **one-line** scientific calculator is allowed. TI-30Xa is recommended. You can also use the computer built-in calculator in basic or scientific mode. You can use either or both of these two options for online exams.

A **one-line** display shows what you type in and the answer on the same line. A simple check is to type in “2 + 2” and then hit “=”. The only thing you should see is the number 4.
