PROBLEM OF THE WEEK

3/27/07 due NOON 4/9/07

CAN YOU GIVE US A SOLUTION?

Problem No. 11 (Spring 2007 Series)

Given triangle with vertices A, B, C . Points A_1, B_1, C_1 are chosen on sides $\overline{BC}, \overline{CA}, \overline{AB}$ resp., such that the centroid of $\triangle A_1B_1C_1$ coincides with the centroid of $\triangle ABC$ and that the ratio $\text{area}(\triangle A_1B_1C_1)/\text{area}(\triangle ABC)$ is minimal. Determine with proof, the location of A_1, B_1, C_1 .

A panel in the Mathematics Department publishes a challenging problem once a week and invites college & pre-college students, faculty, and staff to submit solutions. The objective of this is to stimulate and cultivate interest in good mathematics, especially among younger students. Solutions are due within two weeks from the date of publication. They can be faxed to (765) 494-0548 or sent by campus or U.S. mail (no E-mail please) to:

PROBLEM OF THE WEEK, **8th Floor**, Math Sciences Bldg., Purdue Univ.,
150 North University St., West Lafayette, IN 47907-2067

Solvers should include their name, address, and **status at the University or school**.

The names of those who submitted correct solutions will be posted in the Math. Library, along with the best solution. Every Purdue student who submits three or more correct solutions will receive a Certificate of Merit. A prize fund of \$300.00 will be distributed among the Purdue undergraduates who have contributed at least six correct solutions for the total spring 2007 series.
