

6th Symposium on Analysis and PDEs

Purdue University, June 1–4, 2015

Principal Lecturers

David Jerison (MIT)

Free Boundaries and Minimal Surfaces (minicourse)

Fang-Hua Lin (Courant Institute)

Extremum Problems for Elliptic Eigenvalues (minicourse)

Invited Speakers

Mark Allen (University of Texas at Austin)

Daniela De Silva (Columbia University)

Ailana Fraser (University of British Columbia)

Nikola Kamburov (University of Arizona)

Yuan Lou (Ohio State University)

Svitlana Mayboroda (University of Minnesota)

Luis Silvestre (University of Chicago)

Hung Tran (University of Chicago)

Organizers

Donatella Danielli (Purdue University)

Arshak Petrosyan (Purdue University)

Aaron Yip (Purdue University)

Secretary: **Julie Morris**

Website: <http://www.math.purdue.edu/~arshak/6thSym>

Contributed Talks and Financial Support

Contributed talks (20 min) are being solicited. Preference will be given to graduate students and recent PhDs.

Financial support is available to graduate students, postdoctoral fellows and active senior researchers who do not have grants. People from the underrepresented groups (women and minorities) are particularly encouraged to apply.

IMA Participating Institution (PI) members may use IMA/PI funds to support travel of their personnel.

Deadline for application: April 15, 2015

Sponsors
