## Quiz 12 - MA161 - October 12, 2018

 Alden Bradford1. (10 points) If the half-life of a radioactive substance is 7 days, how long (in days) does it take for a sample to lose two-thirds of its original amount?
[HINT: the original amount does not matter for this problem because it cancels out. You can assume it is 1 gram.]
2. (10 points) Solve $\sinh x=1$ for $x$.
[HINT: first solve for $e^{x}$, then take the log. Remember that $e^{-x}=\frac{1}{e^{x}}$. There is only one solution, because you can't take the $\log$ of a negative number.]
