

MyLab Math “Unlimited Attempts”

- A student gets three “tries” on a homework question; and two “tries” if it is a multiple choice question.
- After three tries, the question is marked incorrect. **However**, the student has the option to choose to attempt a similar question that also has three “tries” (click the button “**Similar Question**”). If that similar question is answered correctly, the student will get full credit for that question.
- Note that a student can request a similar question an *unlimited* times - hence the “unlimited attempts.” There is no penalty for attempting a question multiple times.
