

Assignment for September 5

- Prior to September 5, read Chapters 17, and 18 (sections 18.1 and 18.3 only) from the SOA Experience Studies Reference Manual. We will discuss in class on September 5.
- After you read the material, working as a group, you should complete Exercise 2. Exercise 2 is very similar to Exercise 1 except it is a withdrawal study instead of a mortality study. In withdrawal study, the withdrawals are given exposure to the end of the year whereas deaths are only give exposure to the time of death. If you want a reference, see the example on Page 59 of the SOA Experience Studies Reference Manual. You may make one submission per group. Your first submission will be the only one counted.
- Try to automate the process for the in class exercise using either Excel, R, or Google Sheets.
