

Homework 11

MA 35100 (Spring 2024, Section 130)

April 1st, 2024

Instructions

- Due: Saturday, April 6th at 11 PM Eastern Time.
- Total Score: 25 points.
- The three lowest homework scores will be dropped from the final grade.
- One late submission is permitted (over the course of the semester) with no questions asked.
- Submissions can be hand-written or typed in L^AT_EX and must be submitted on Gradescope.
- You are allowed to discuss and collaborate on problems. However, each student must work on the final submission on their own. **In particular, copying someone else's final submission will be considered cheating and will be reported to the Office of the Dean of Students.**

Problem 0. [0 points] Copy paste the following text in the beginning of your submission:

I have not made use of any unauthorized resources (including online resources) while working on this submission. Any collaboration with other students conforms with the policies of this course.

After that, list all students you collaborated with, clearly indicating which problems you worked with them on. If you did not collaborate with anyone, clearly state this instead.

The following is relevant for Problems 1, 2, and 3:

$$A = \begin{bmatrix} 1 & 2 & 0 \\ -3 & 2 & 3 \\ -1 & 2 & 2 \end{bmatrix}, \quad B = \begin{bmatrix} 2 & 0 & 0 \\ -2 & -2 & 2 \\ -5 & -10 & 7 \end{bmatrix},$$
$$C = \begin{bmatrix} 2 & 1 \\ 0 & 2 \end{bmatrix}, \quad D = \begin{bmatrix} -18 & 30 \\ -10 & 17 \end{bmatrix}.$$

Problem 1. [8 points] For each of the matrices $X \in \{A, B, C, D\}$ compute the characteristic polynomial of X and thus find the eigenvalues of X .

Problem 2. [12 points] For each eigenvalue of $X \in \{A, B, C, D\}$ compute the eigenspace (by expressing it as a span).

Problem 3. [5 points] Determine if $X \in \{A, B, C, D\}$ is diagonalizable over \mathbb{R} . If it is, diagonalize it.
