

La Plata, may 5th 2011

Dr. José M. Carcione

Istituto Nazionale di Oceanografia e Geofisica Sperimentale- OGS

Borgo Grotta Gigante 42/c, 34010, Sgonico, Trieste, Italy

This letter invites you to participate in the Meeting and following technical Workshop organized by Universidad Nacional de La Plata (UNLP), La Plata, Argentina and the petroleum company REPSOL-YPF as members of the research project CAPP ONDAS (Consorcio Asociativo Público Privado Ondas) in which OGS is a participating member.

The Meeting will be held in the REPSOL-YPF Argentina Technological Center, Baradero S/N, 1925 Ensenada, Buenos Aires, Argentina in the period 10th-21st may 2011,

In this Meeting it will be determined the funds to be assigned to the project, deadlines for the different topics to be covered, the researchers in charge of each area and their respective activities.

The Workshop will include technical discussions about the main topics of the project, i.e., wave propagation in fractured reservoirs, and sensibility of the acoustic response of hydrocarbon reservoirs to changes in composition and fluid properties of the saturant fluids.

These topics will include develop of physical and numerical models to analyze dispersion and attenuation of waves travelling in these type of media, anisotropy detection using prestack data and the combined use of fluid flow and wave propagation numerical simulators for seismic monitoring of assisted oil recovery in oil fields at their production stage.

I hope that you will be able to participate in this Meeting and Workshop, since your expertise in the mentioned topics surely will help to properly define the research activities to be covered.

Dr. Juan Enrique Santos

Jefe del Departamento de Geofísica Aplicada

Observatorio Astronómico

Universidad Nacional de La Plata
