## MATHEMATICS TUTOR LIST SPRING 2008

The Mathematics Department does not hire tutors. Rather, as a service to students, we provide a list of available individuals, who have been screened solely on the basis of their transcripts. Based on the mathematics courses they have taken and the grades they have received, they appear to be qualified to tutor in the courses listed. The list is updated periodically throughout the semester.

If you are interested in a tutor, please contact one of the individuals listed. All arrangements, including pay, will be made between you and the tutor. While the Mathematics Department does not guarantee the service you will receive, we would like to know if there are significant problems with any tutor. These problems will be taken into consideration when publishing future tutor lists.
