

Some Basic WebAssign Usage for Students

Department of Mathematics
Purdue University

Fall 2011

Useful Web-Sites

- ▶ **For student login:**

`http://www.webassign.net/purdue/login.html`

use your **Purdue Career Account** information.

(The web-site: `http://www.webassign.net/` is for **instructors' use**, not for students.)

- ▶ **Other helpful web-sites:**

- ▶ **Mathematics Departmental Course Web-Page:**

`http://www.math.purdue.edu/academic/courses`

- ▶ **Some Basic WebAssign Help:**

`http://intranet.math.purdue.edu/webassign`

Student Account Access

- ▶ Once you have enrolled through **Purdue Banner**, **after one day or so**, your name will automatically show up in the WebAssign roster.
- ▶ If you **change sessions**, you need to **inform your instructor/TA** in order to have your records to be transferred.
- ▶ You have **two weeks trial period** before you are required to enter the online access code.

Purchasing of WebAssign Online Access

- ▶ From Purdue University Bookstore, Follett's Bookstore. The **Purdue Edition** of the textbooks **come with multiple semesters Webassign online access code**. (This appears to be the best deal for first year students.)
- ▶ Just purchase the **online access code** from your **WebAssign account page**. You can choose from **single or multiple semesters access/with or without eBook**. (The Stewart Calculus 7th edition is automatically equipped with an **eBook**.) You can purchase the hard copy of the textbook from any other venues of your choice.
- ▶ Go to <http://www.cengagebrain.com> for (sometimes) better deals. They will mail you the online access code and might only accept checks. (It is **your responsibility** to make sure that you receive the code before the end of the two-weeks' trial period.)

Textbook List

For **Fall 2011**,

- ▶ **MA 161, 165**: Stewart Calculus, Early Transcendentals, **Seventh** Edition
- ▶ **MA 162, 261**: Stewart Calculus, Early Transcendentals, **Sixth** Edition
- ▶ **MA 265**: Kolman and Hill, Elementary Linear Algebra and Applications, **Ninth** Edition (plus Matlab Workbook).

Some Tips of Entering your Answers in WebAssign

- ▶ For numerical entering questions, you have by default **100 chances**.
- ▶ For multiple (True/False) questions you have only a **limited number of (one) chances**.
- ▶ Whenever possible, always enter **exact mathematical expressions** (by using the math palette provided).
- ▶ For numerical answers, as a rule of thumb, enter at least four decimal places (or four significant numbers).
- ▶ **Capital and small letter** variables are treated **differently**: for example: Π (Pi) vs π (pi); Φ (Phi) vs ϕ (phi); Θ (Theta) vs θ (theta) and so forth.
- ▶ Questions which prompt for the open or close brackets " $(,)$ ", " $[,]$ " are treated as True/False questions and hence allow only **one chance**.
